

## **PRESS RELEASE from Data Panel**

Publication: 19.05.2020

Authors: Jörg Krautter, Michael Dietrich

### **Modern installation solutions for mobile machines**

Can the electrical installation of mobile machines not be as simple as playing LEGO®? - no matter how you need the system, simply plug them together quickly and without errors?

In the market segment of mobile machines, inflexible cable harnesses and leaking terminal boxes are unfortunately still state-of-the-art.

Unlike conventional installation solutions, Data Panel GmbH, a new member of the Murrelektronik Group, now offers a coordinated, modular and pluggable system construction kit.

Whether fieldbus modules, passive distributors, or pre-assembled cables - Data Panel's comprehensively tested products prove to be robust, leak-proof, and reliable in practice.

The Data Panel modular installation system offers great advantages, particularly for special machines in the agricultural, construction, municipal and transportation sectors.

Data Panel employees are happy to advise your customers individually on site, according to the motto: "Together we will find the best solution: plugged in - done!"

### **Data Panel to the point**

DATA PANEL stands for high-quality, easy-to-install, decentralized and modular installation solutions for your mobile machine.

### **Information on setting up a company**

Data Panel GmbH is a member of the Murrelektronik Group and was founded on 10.03.2020 in Backnang. The company founders and co-partners are Jörg Krautter (Managing Director) and Michael Dietrich (Head of Sales and Marketing).

The objective of the company is the marketing of electronic products and assemblies, as well as technology and application consulting for the market segment of mobile automation.

*"xtremeDB stands for maximum flexibility"*

*The CANopen fieldbus module offers 8 slots for inputs and outputs. The signal types Digital, Analog, PWM / PWM(I), Ratiometric, Counter/Frequency are individually configurable for inputs and outputs. Thanks to the end-to-end DEUTSCH connection technology, xtremeDB can be integrated both with pre-assembled sheathed cables and in cable harnesses. link:*
